

HACKATHON-24

In vitro Diagnostics

To support innovation for global health driving transformative advancements for early disease detection

Application Open Date
15th Jan 2024
Last Date of Submission
15th Mar 2024

Duration of Hackathon
4 Days ; 04-07 Apr 2024

Free boarding &
lodging for
the entire duration
of the Hackathon

Infrastructure & facilities available

- Prototyping Lab for Fabrication
- NABL Accredited Pre-Compliance Testing Laboratory
- Cell & Tissue Culture Lab
- Center for Electric Components & Sensors
- Biomaterial Testing Laboratory
- Access to the Common Scientific Facilities
- Availability of fully furnished office spaces

Benefits

- Rs. 10 Lakh on-boarding expenditure
- Support for 05 prototypes
- Testing infrastructure support
- Support for 'Go to Market Strategy'

Domain:
Developing In vitro Diagnostic Kits
from the categories listed in
Annexure - I

Targeted Diseases for Rapid Antigen Kits

- Cutaneous Diphtheria
- Leprosy
- Lobomycosis
- Hemorrhagic Fever with Renal Syndrome
- Neo Natal Sepsis
- Naegleriasis
- Balantidiasis
- Baylisascariasis
- Rhinosporidiosis
- Human T- Lymphotropic Virus Type 1
- Lagochilascariasis
- Tropical Sprue
- Loiasis
- Mansonelliasis
- Microsporidial Keratitis
- Morgellons Disease
- Mucopolysaccharidoses
- Tinea Corporis
- Scabies
- Sparganosis
- Tinea Versicolor
- Trachoma
- Tunga Penetrans
- Yellow Nail Syndrome
- Phaeohyphomycosis
- Rat-Bite Fever
- Ringworm

Antimicrobial Susceptibility Kits

- Streptococcus pneumonia
- Salmonella enterica

Co-Infection Diagnostic Kits

- Human Immunodeficiency Virus & Tuberculosis
